DETAILED ACTION

Election/Restrictions

Note that Application contains claims with two distinctive classes, and claims of each group with a different class contain patentably distinct species.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-14, and 25-32 drawn to a semiconductor device, classified in class 257, subclass 767.
 - II Claims 15-24, and 33-44 drawn to a method of fabricating a semiconductor device, classified in class 438, subclass 686.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process. For example, the claimed device can have any contact plug like a tungsten layer rather than a titanium layer which is specified in the claimed process.

Art Unit: 2811

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining on the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Should Applicant elect Group claims I to be examined, Applicant is advised that this application is further restricted because it contains product claims 1-14 and 25-32 directed to the following patentably distinctive species of the claimed invention.

Embodiment 1 of Figure 1

Embodiment 2 of Figure 2

7. Should Applicant elect Group claims II to be examined, Applicant is advised that this application is further restricted because it contains product claims 15-24 and 33-44 directed to the following patentably distinctive species of the claimed invention.

Embodiment 1 of Figure 3A-3E

Embodiment 2 of Figure 4A-4D

8. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none is generic for both groups.

9. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

10. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

11. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
